KICK IT TO THE CURB!
COMPOST TO REDUCE LANDFILL WASTE

In the La Plata County region, about 40% of what goes to our landfills is food & other organic matter. This is a total waste – for our community, our soil, our farmers, and our climate.

As climate activists and carbon farmers, here at Table to Farm Compost we are working in the La Plata County region to divert waste from landfills, reduce methane emissions, and recycle organic materials into living soil.

Join the movement! It’s as simple as throwing your food scraps into a happy green bucket instead of your trash can. Once a week, on your recycling day, bring that full green bucket to the curb and we’ll swing by to pick it up. Those scraps will go to our farm and be recycled into new, vibrant soils. Your food waste will stay out of the landfills and go back into the Earth!

Did you know that food scraps that decompose in the landfill generate methane? Every green bucket makes a difference!

What you CAN compost:
- Vegetable and fruit scraps
- Eggs and dairy*
- Shredded paper products
- Plate scrapings
- Old pasta
- Kleenex
- Sawdust
- Nut shells
- Grass clippings
- Fruit rinds and pits
- Grains and starches*
- Unbleached paper towels
- Vacuum contents
- Wood ash (not charcoal)
- Harder foods (broccoli stems, pineapple, corn cobs) chop into small pieces
- Hair clippings (animal and human)*
- Coffee grounds, unbleached filters, teabags *in small quantities

What you CANNOT compost:
- Fat or grease
- Bones
- Plastic
- Rubber
- Compostable “plastics”
- Yard waste
- Flowers
- Woody debris
- Animal or human waste

Your Trash Is The Earth’s Treasure! Your food scraps can save the planet! If everyone in the La Plata County region recycled their food scraps into compost, we could grow higher quality food and sequester carbon. As a community, we can transform our “waste” into living soil, building local self-reliance and supporting people, the planet, and prosperity for everyone.

TESTIMONIAL

“I really like the sawdust that’s included with my compost bucket. It makes it so much easier to keep the bucket clean. I store mine in a 5 gallon bucket to minimize dust. When I need to use it, I open the bucket and toss in a few handfuls of sawdust. So easy!”

- Bev Shade

YOUR INDIVIDUAL ACTION, COMBINED WITH OUR COMMUNITY, CAN MAKE A TREMENDOUS IMPACT. BE PART OF THE WASTE REDUCTION AND CLIMATE CHANGE MOVEMENT.
